

## A GUIDE FOR RIDE OUTS

1. Always turn up on time
2. Make sure you have a full tank of PETROL
3. Make sure before you leave home that you have money (and tickets if on way to a rally)
4. If the meeting time is e.g. 10.00 am then that means heading off at 10.00 am not arriving at 10.00 and wanting a tea or coffee
5. If a route has been planned then stick to it as last minute changes only cause confusion
6. Always use the Buddy system if the rider behind you stops or slows right down, then you stop or slow right down. If everybody does this then no one should get lost or separated.
7. Always try to stay in the same order, that way the rider in front knows who should be behind them.
8. The lead rider should always stay within the limits of the slowest rider in the pack.
9. Always try and keep to a staggered formation this will help the rider in front of you to see you more easily and also gives you more room to manoeuvre - and ride with your lights on dipped beam AT ALL TIMES!
10. If your bike breaks down and you get separated from the group, and you get your bike restarted, unless you know the route - STAY with your bike. We can easily backtrack to find you!
11. Always have fun, Ride Safe and Free
